

Veriato Investigator®

Forensic Grade Employee Investigation Software

Veriato Investigator is an affordable, forensic-grade employee investigation solution. Easy to install and use, it captures all employee computer and Internet related activity, from basics like websites visited through emails sent and received, to powerful screen capture that can be replayed as if watching a video recording of exactly what was done. Veriato Investigator users report significant reductions in the cost of investigations - often up to 50% - while achieving better results stemming from the existence of an unbiased, easy to understand presentation of fact Veriato Investigator is perfect for temporary, focused investigations and is used by both large enterprises and small businesses to produce reliable, actionable evidence.

KEY BENEFITS

INVISIBLE

During an investigation, it's critical that you capture unmodified employee behavior. Using sophisticated stealth technology, agents are hidden from the employee, insuring you get the evidence you need.

SECURE

All captured recordings are encrypted for data integrity. Access to the data viewer and central management console is restricted to only those you grant permission.

SIMPLE

No dedicated infrastructure is required. Installation and configuration takes minutes, not hours. Data is presented in easy to view format, meaning no specialized expertise is required to interpret the results.

EXPORTABLE

Data can be exported to multiple file types, for archiving or for use as evidence, with a few mouse clicks. You can select specific events and data types relevant to the investigation, or export the entirety of the captured activity.

PROBLEM

Employee investigations are a fact of business life. When the need arises to inspect an employee's digital activity, speed, accuracy, and ease of use are critical factors. Often, the need to investigate requires an urgent response - leaving little time to gather data. The longer it takes to get the answers you are looking for, and the evidence needed to support resolution of the investigation, the greater the risk to your company. In addition, management is typically on edge, demanding fast action and not understanding the significant effort involved in assembling even a partial picture of employee activity using native tools.

SOLUTION

The solution is Veriato Investigator. Backed by 15+ years experience in recording digital activity, using powerful & innovative technology that has been deployed at over 36,000 companies and government entities, Veriato Investigator deploys rapidly and requires no specialized infrastructure or skills. Proven to deliver a reliable, actionable and complete picture of employee activity - including screen playback that allows you to see, in context, exactly what the employee did.

AUTOMATICALLY RECORD

- Websites Visited
- Online Searches
- Emails (including webmail)
- Chats/Instant Messages
- Keystrokes
- Program Activity
- Network Activity
- File Transfers
- Documents Saved / Printed
- Screen Snapshots

A LICENSE TO FIT YOUR NEEDS

Veriato Investigator supports multiple licensing options, so you get the software you need in a manner that best aligns to your usage.

TERM LICENSES

Available in 60 or 90 day terms. Designed for temporary, focused investigations. Full recording and review capability. Additional term licenses may be applied to extend an investigation.

FLOATING LICENSES:

Designed for focused employee investigations, these licenses can be redirected to other employees as needed. Full recording and review capability. Perpetual license with annual renewal for maintenance and support.

MONITORED ENDPOINT:

Used for ongoing employee monitoring or for long-term investigation of a particular employee. Full recording and review capability. Perpetual license with annual renewal for maintenance and support.
