

RansomSafe®

DON'T BE HELD HOSTAGE.
GET PROTECTED.

Veriato® RansomSafe acts as a vital layer in your ransomware defense, combining just-in-time data protection with multiple mechanisms to detect, and shut down attacks before they hold your business hostage.

KEY BENEFITS

PROTECTION

Should ransomware reach your file server, Veriato® RansomSafe detects the attack and shuts it down before your data is encrypted

FAIL-SAFE BACKUPS

RansomSafe backs up your files before they are changed, making a pristine copy of the latest version of your files.

RAPID RECOVERY

Once the attack is disrupted, recover in minutes with just a few clicks. No extensive, and expensive, downtime.

INSTALLS AND CONFIGURES IN LESS THAN 10 MINUTES. GET PROTECTED.

FILE SCREENING

Veriato® RansomSafe is continuously updated, maintaining a robust database of known ransomware signatures. The software detects the presence of known variants by matching against this database.

FAIL-SAFE

The best protection against the disruption and expense of a ransomware attack is current backups. Veriato® RansomSafe intercepts the command to encrypt (or delete) your files, making a copy and storing it safely away from the reach of the attack.

HONEYPOTS

By helping you place honeypot files on your file that, if modified, alert Veriato® RansomSafe to a ransomware attack, the software is able to reliably detect attacks from previously unknown variants.

LOCKDOWN

Veriato® RansomSafe blocks the user account attempting to encrypt your files from making changes to the file system, shutting down the attack to prevent further encryption attempts and to minimize the restoration effort required. Veriato® RansomSafe can send you an email notification immediately if and when this happens, allowing you to respond quickly.

PROBLEM

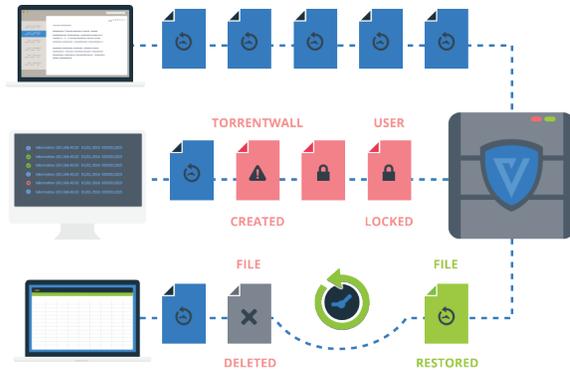

Ransomware, a type of malicious software that blocks access to a computer system until money is paid, continues to cause mayhem within organizations worldwide. In fact, recent research shows almost one out of every two organizations have suffered at least one ransomware attack over the previous year, most often in the healthcare and financial services industries—and that those organizations impacted spend an average of 33 hours recovering their encrypted data.

SOLUTION

RansomSafe combines its ransomware defense capabilities with failsafe backup and rapid recovery, providing a vital layer of defense against attacks. With RansomSafe, organizations can not only detect a ransomware attack and lock the affected user out, but they also have access to current, automatic backups that allow the recovery of data with just a few clicks. Most organizations have a pervasive lack of quality current backups, particularly SMBs. Statistics show that only 23 percent of companies can successfully restore their data. With RansomSafe, the attack is disrupted, preventing the need for any ransom payout—or extensive and expensive system downtime.

KEY FEATURES

VERIATO® RANSOMSAFE SAVES YOUR COMPANY TIME AND MONEY, AND SAVES YOU FROM HAVING TO DEAL WITH A PAINFUL RECOVERY PROCESS.

RECOVER IN MINUTES VS HOURS WITH NO LOSS OF ACTIVITY FROM OTHER ENDPOINTS

LIGHT WEIGHT

Installs in minutes. Updates automatically. Server-side protection compliments your endpoint-based malware defenses without adding administrative overhead.

AFFORDABLE

Priced well below the cost of a single ransom payment, the solution provides peace of mind without taking a big piece of your budget.

ABOUT VERIATO

Veriato is an innovator in actionable User Behavior Analytics and the global leader in User Activity Monitoring. More than 36,000 companies, schools, and government entities worldwide have relied on Veriato solutions to gain insight into the user activity on their network, and enjoy the security and productivity increases that come with it. The Veriato mission is to provide world-class software and support that enables our customers to protect their most valuable assets, reduce their risk, and gain unparalleled visibility into their operations. Veriato's award-winning solutions include Veriato Recon (behavioral analytics based insider threat detection), Veriato 360 (enterprise-grade User Activity Monitoring), Veriato Investigator (employee investigation tool), Veriato Log Manager (event and security log management) and Veriato Server Manager (server management solution).

LICENSING

RansomSafe is licensed per server. RansomSafe licenses are perpetual.

SYSTEM REQUIREMENTS

Installation

- Windows Server 2012 R2 (Including Failover Clustering File Server support)
- Windows Server 2012 (Including Failover Clustering File Server support)
- Windows Server 2008 R2
- Windows Server 2008 (32-bit and 64-bit)
- Windows 10 (32-bit and 64-bit)
- Windows 8 / 8.1 (32-bit and 64-bit)
- Windows 7 (32-bit and 64-bit)
- Windows Vista (32-bit and 64-bit)
