

Veriato® 360

Veriato 360 is the most widely deployed and used employee monitoring solution in the world. The software captures accurate, detailed information that shows exactly what your employees and contractors are doing with the resources and accesses that you provide to them. You control what data is collected, and when. You control who can review the data. Powerful alerting, reporting, and search capabilities are designed to minimize the time spent looking for answers, and DVR-like playback eliminates gray areas. Whether you are seeking greater visibility to help you improve productivity, conduct a critical investigation, or make sure your important data is safe - Veriato 360 can help.

Why Veriato?

More than 15 years providing powerful, reliable, and usable reports, alerts, and visibility into employee and contractor activity

Customers located in over **110 countries** around the world

36000 [and counting] small, mid-sized, and large enterprise organizations have placed their trust in Veriato solutions

Millions of users monitored to enhance productivity, protect company data, and conduct accurate investigations

Key Features

Veriato 360 is the first solution to offer video playback on both Windows and Mac endpoints, as well as Android support for mobile monitoring – showing employee intent and proven to hold up in court.

Veriato 360 collects data on online and communications activity, enabling you to gain a complete picture of an employee’s actions and the context they occurred in. No more gray areas.

Scheduled reports and a comprehensive alerting capability minimizes the time spent in the console, while delivering the visibility and protection your company needs.

Benefits

Provides at-a-glance visibility into the activity occurring in your company, combined with intuitive, powerful search capabilities that let you see exactly what happened in just a few clicks.

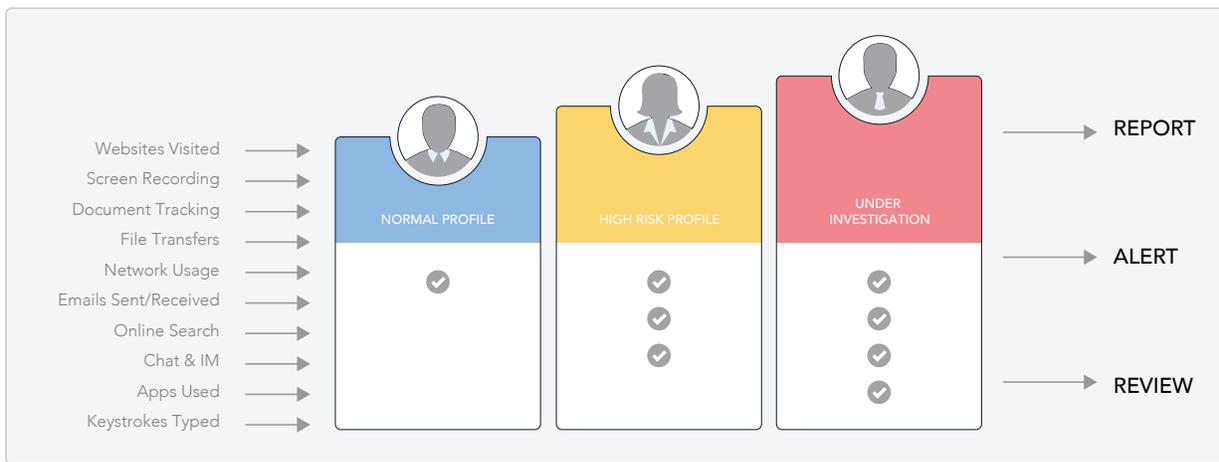

Granular control over what data is collected, when it is collected, and who can access and review it, protects employee privacy.

Uniquely accurate record of application usage, data access and movement, and internet activity.

Capabilities

Veriato 360 provides a combination of powerful data collection with granular control, and presents data in a clear, compelling way that gives you the answers you need to achieve your goals.

See exactly what occurred, in context

Screen Capture

Veriato 360's screen capture feature records everything on a monitored computer's screen. You define how frequently you wish to capture the screen, from the default of every 30 seconds to as often as every second.

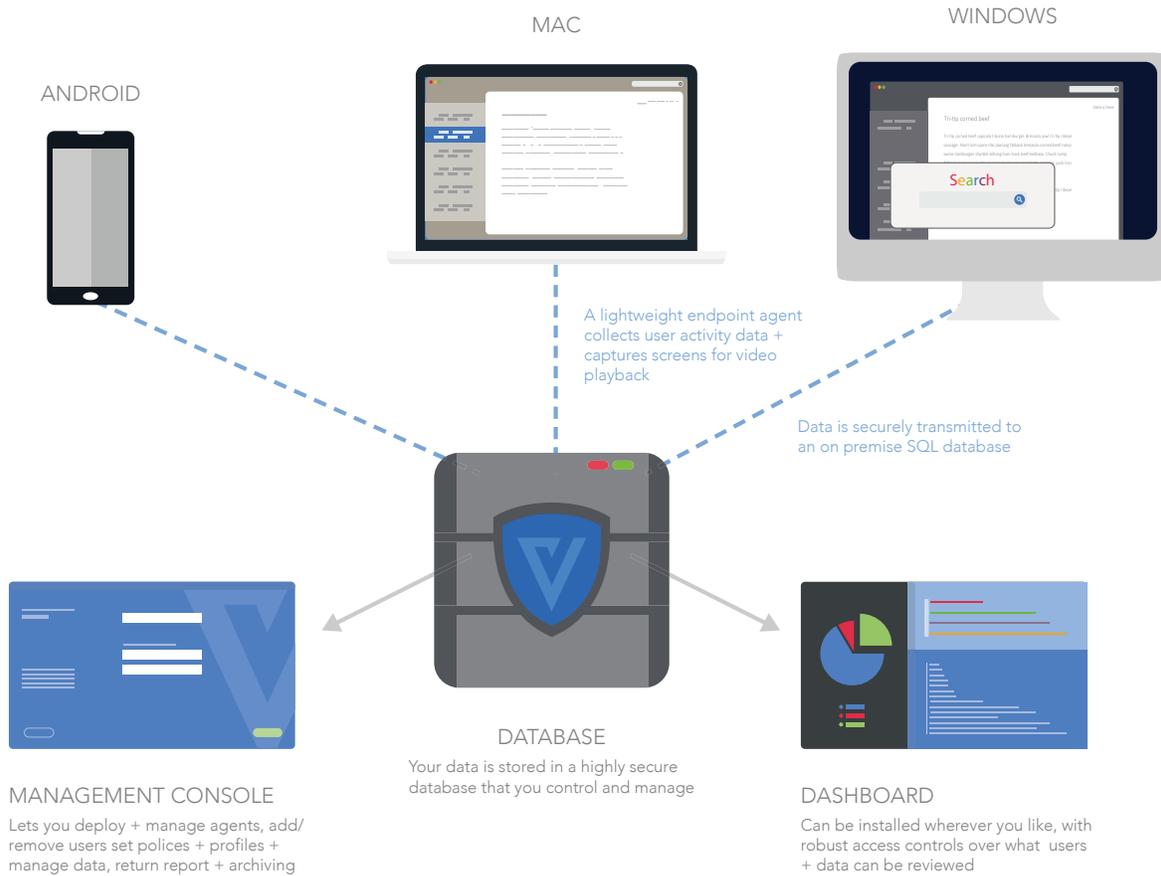

In addition to regularly defined intervals, triggers can be used to initiate screen capture or to accelerate the interval at which captures occur.

Play it back, like your DVR

Video playback of screen activity let's you see exactly what happened, in context. No gray areas; nothing is more effective than pictures.

Export

Screen snapshots can be exported as individual BMP or JPG graphic files. Multiple snapshots can be exported together as an AVI video file.

Trusted by **thousands** of companies
in more than 110 countries around the world
