

THE INSIDER THREAT

NATURE OF INSIDER THREATS

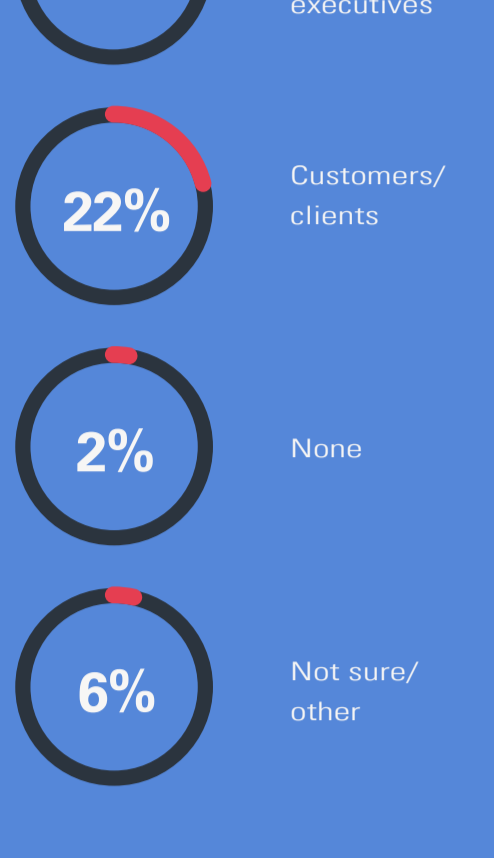

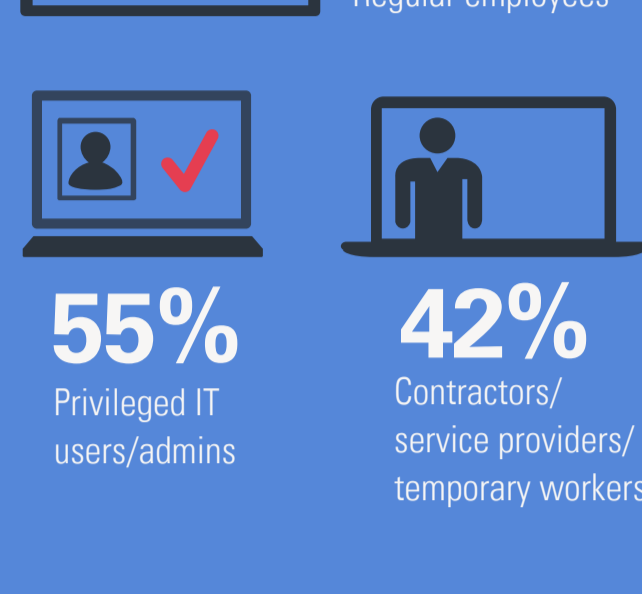

Too often, people associate the term "Insider Threats" in cybersecurity with malicious employees intending to directly harm the company through theft or sabotage. In truth, negligent employees or contractors unintentionally cause an equally high number of security breaches and leaks by accident.

What type of insider threats are you most concerned about?

RISKY INSIDERS

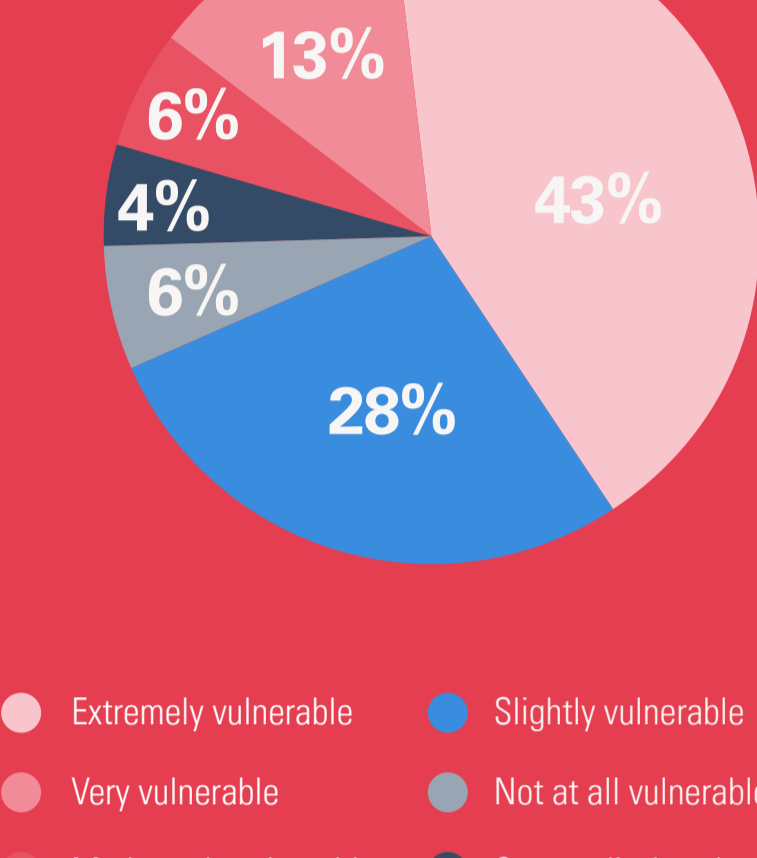

What type(s) of insiders pose the biggest security risk to organizations?*

VULNERABILITY TO INSIDER THREAT

How vulnerable is your organization to insider threats?

90% feel vulnerable to insider threats

MOST VULNERABLE DATA

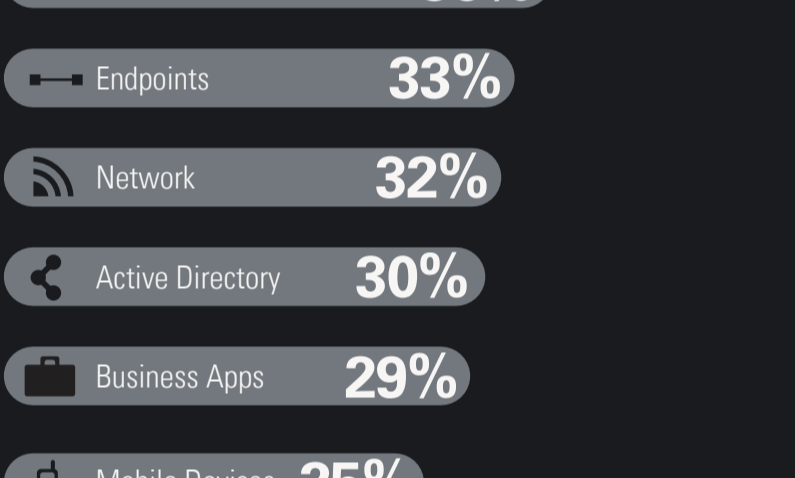

What type(s) of data are most vulnerable to insider attacks?

Not sure/other 1%

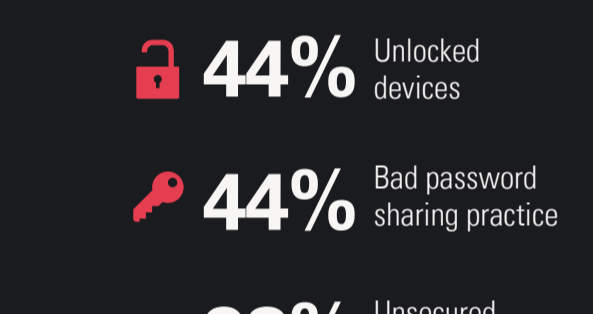

IT ASSETS AT RISK

What IT assets are most vulnerable to insider attacks?

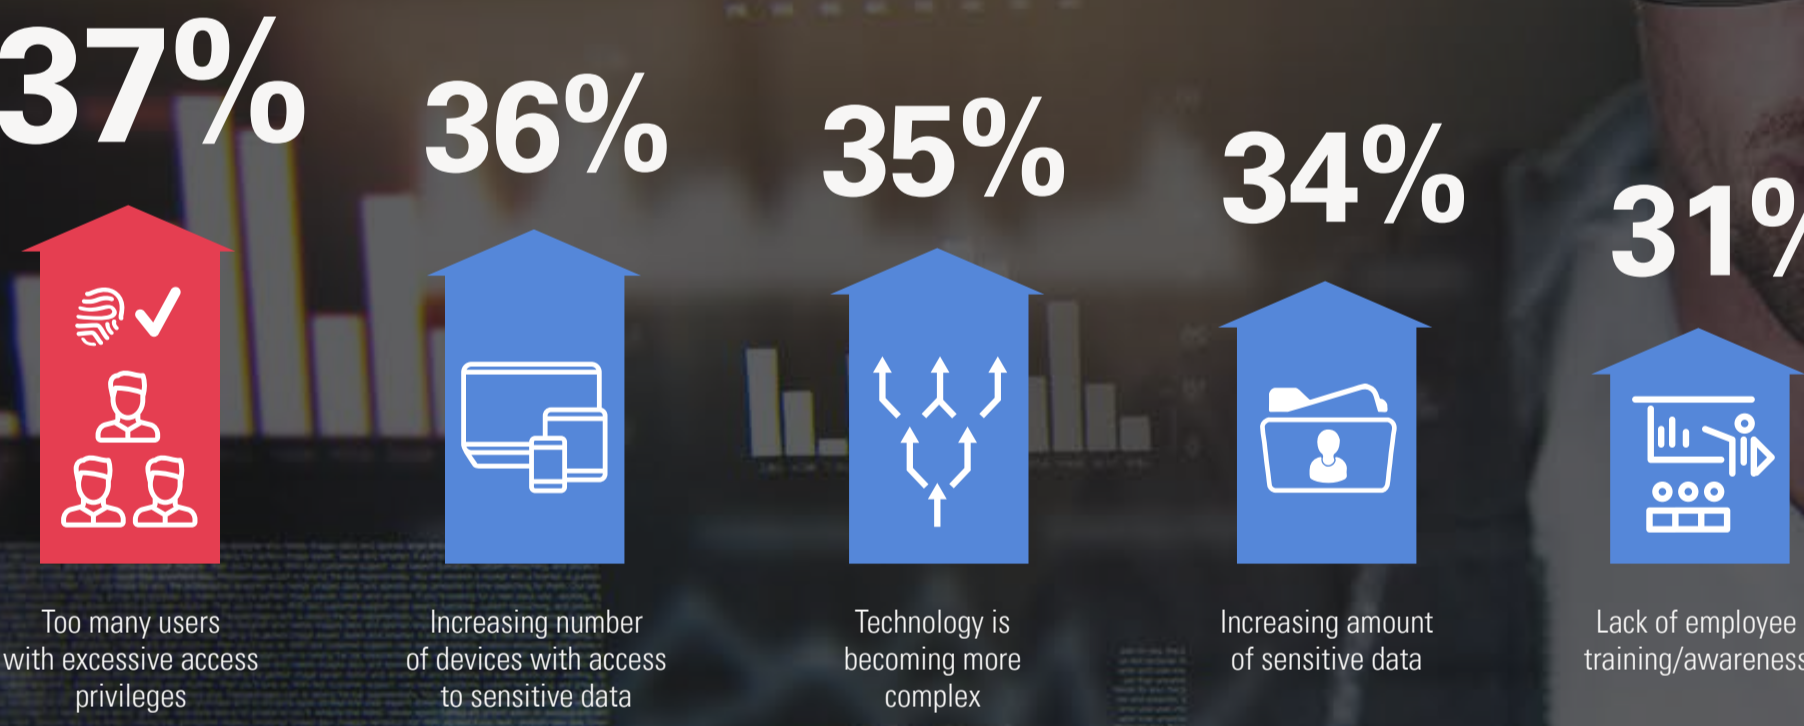

ACCIDENTAL INSIDERS

What do you see as the biggest enabler of accidental insider threats?

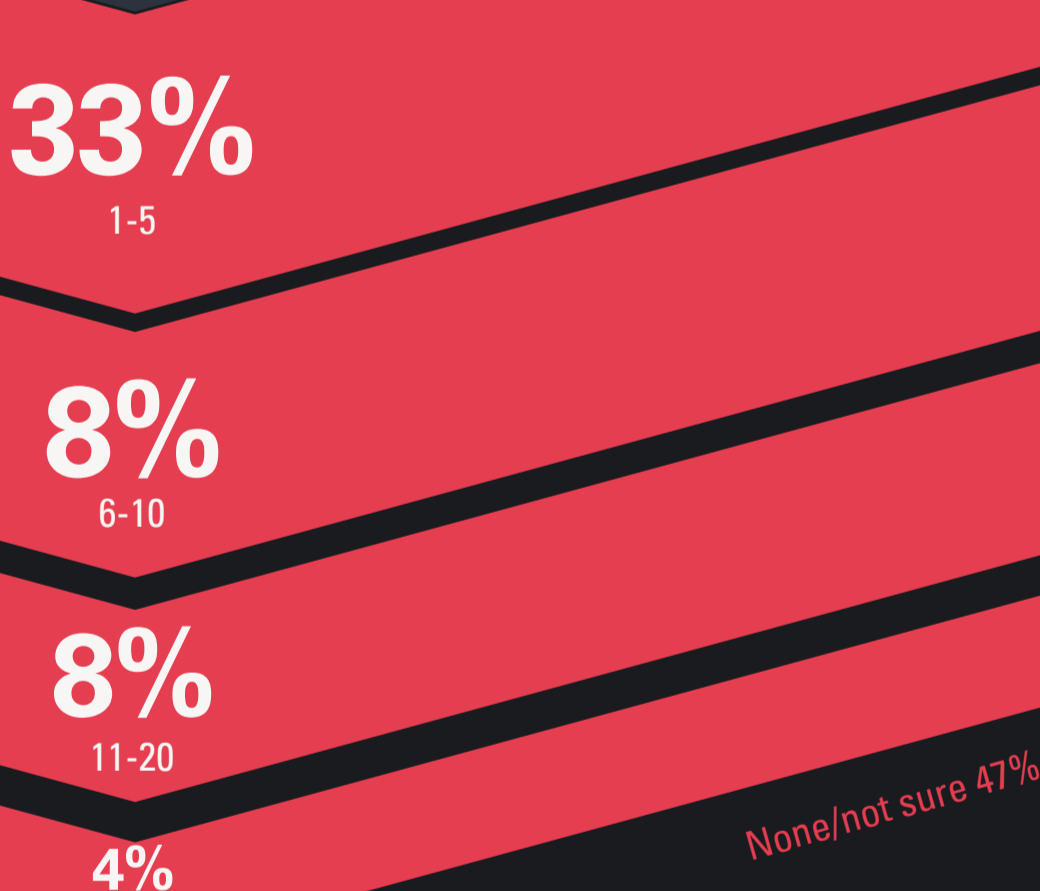

ENABLING RISK FACTORS

What do you believe are the main enablers of insider attacks?

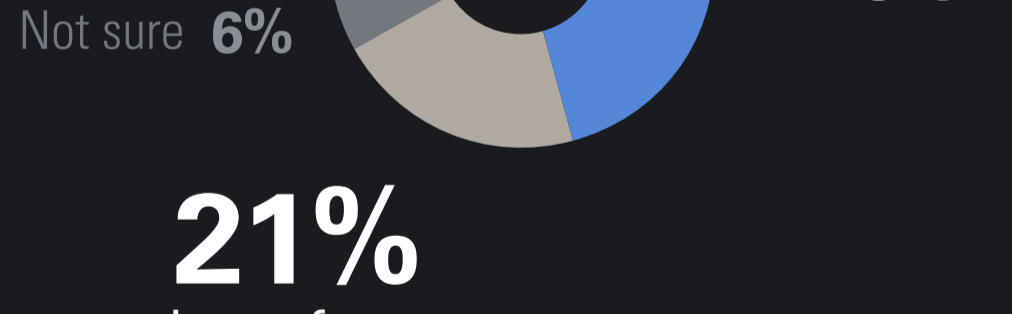

RECENT INSIDER ATTACKS

How many insider attacks did your organization experience in the last 12 months?

None/not sure 47%

Have insider attacks against your organization become more or less frequent over the last 12 months?

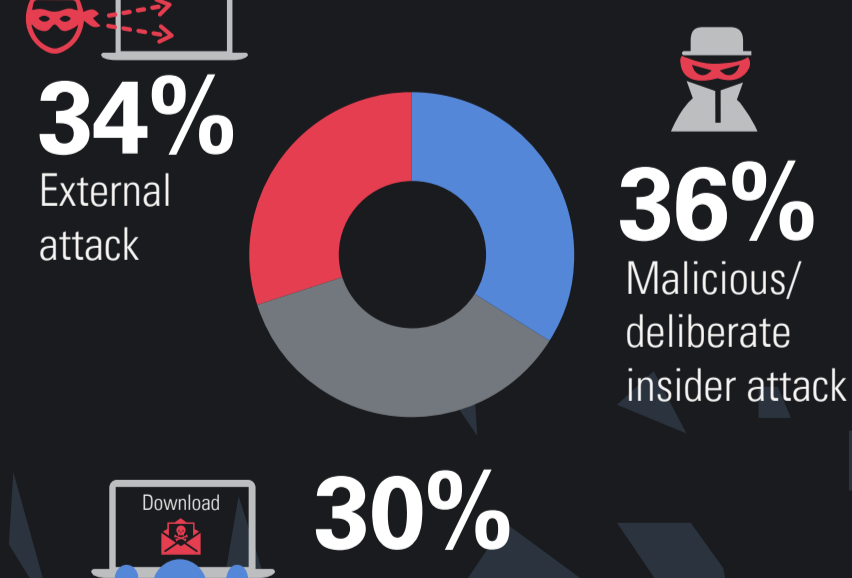

Not sure 6%

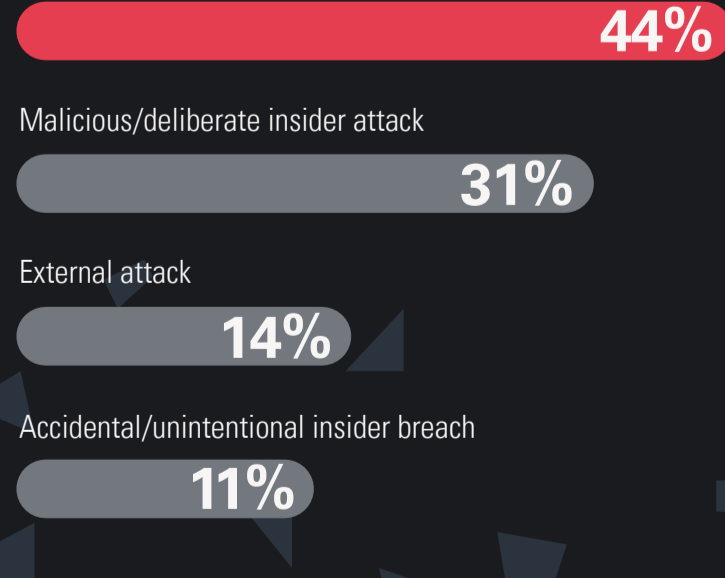

IMPACT OF INSIDER ATTACKS

Two-thirds of organizations (66%) consider malicious insider attacks or accidental breaches more likely than external attacks.

What IT assets are most vulnerable to insider attacks?

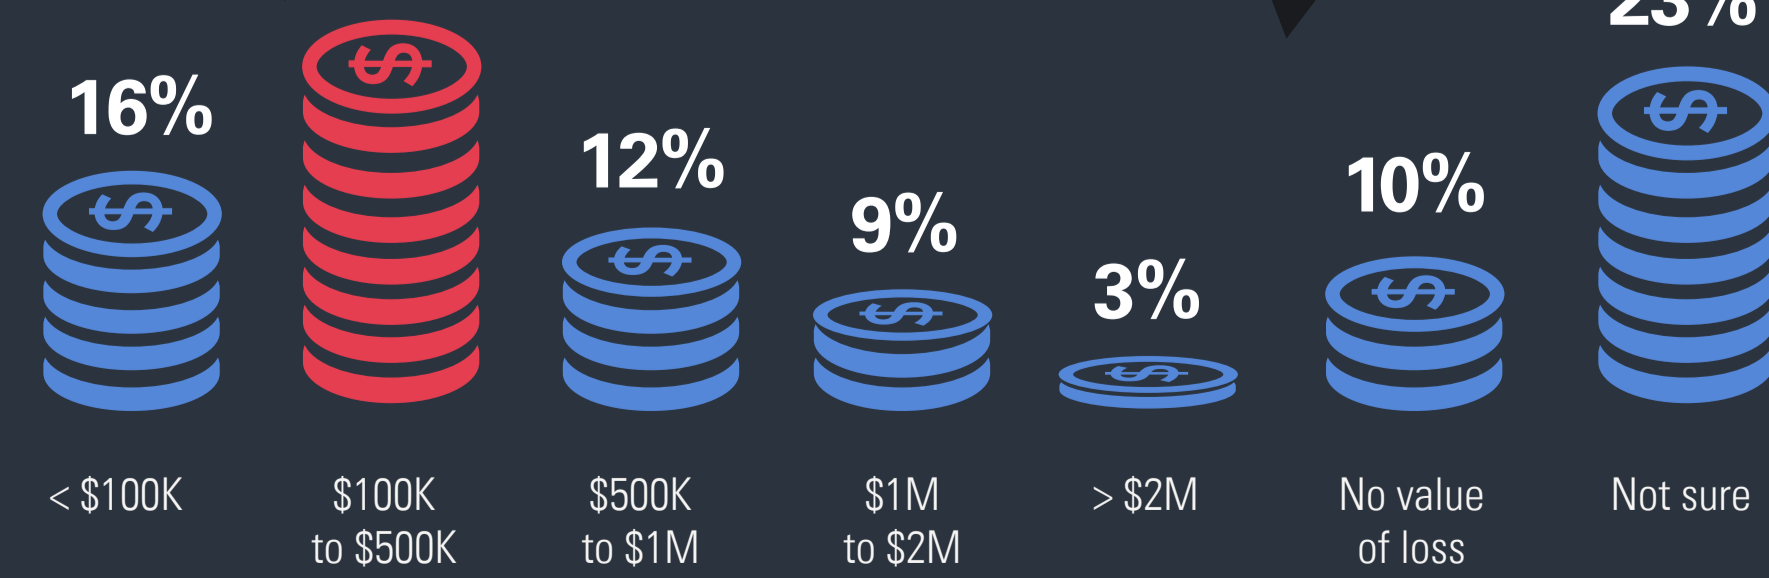

What threat do you consider more DAMAGING to your organization?

COSTLY INSIDER ATTACKS

While true cost of a major security incident are not easy to determine, the most common estimate is a range of \$100,000 to \$500,000 per successful insider attack (27%), 24% expect damages to exceed \$500,000.

What would you estimate is the potential cost/loss of an insider attack in US Dollars?
